Bolyai Society – Springer-Verlag

COMBINATORICA **20** (4) (2000) 597–598

CONTENTS OF VOLUME 20

NUMBER 1

BÉLA BAJNOK, SHAHRIAR SHAHRIARI: On uniform f-vectors of cutsets in the truncated Boolean lattice 1
MICHELE CONFORTI, BERT GERARDS, AJAI KAPOOR: A theorem of Truemper 15
PÉTER L. ERDŐS, ÁKOS SERESS, LÁSZLÓ A. SZÉKELY: Erdős–Ko–Rado and Hilton–Milner type theorems for intersecting chains in posets 27
ILIJAS FARAH: Approximate homomorphisms II: Group homomorphisms .. 47
JAMES F. GEELEN: An algebraic matching algorithm 61
VINCE GROLMUSZ: Superpolynomial size set-systems with restricted intersections mod 6 and explicit Ramsey graphs 71
JEANNETTE JANSSEN, KYRIAKOS KILAKOS: Adaptive multicolouring 87
JIŘÍ MATOUŠEK: On the signed domination in graphs 103
ERICH PRISNER: Bicliques in graphs I: Bounds on their number 109
RAPHAEL YUSTER: Decomposing hypergraphs into simple hypertrees 119
NOTES
TAO JIANG, DHRUV MUBAYI: New upper bounds for a canonical Ramsey problem 141
ANDREĬ KOTLOV: Spectral characterization of tree-width-two graphs 147

NUMBER 2

S. BOBKOV, C. HOUDRÉ, P. TETALI: λ_∞, vertex isoperimetry and concentration 153
BÉLA BOLLOBÁS, ANDREW THOMASON: The structure of hereditary properties and colourings of random graphs 173
JÁNOS KOMLÓS: Tiling Turán theorems 203
MEKKIA KOUIDER: Neighborhoods and covering vertices by cycles 219
JÁNOS KÖRNER, GÁBOR SIMONYI: Graph pairs and their entropies: modularity problems 227
RAN RAZ: VC-dimension of sets of permutations 241
VOJTĚCH RÖDL, ENDRE SZEMERÉDI: On size Ramsey numbers of graphs with bounded degree 257
JOEL SPENCER, GÁBOR TARDOS: Ups and downs of first order sentences on random graphs 263
ISTVÁN TALATA: A lower bound for the translative kissing numbers of simplices 281
NOTE
ANDREW DABROWSKI, LAWRENCE S. MOSS: The Johnson graphs satisfy a distance extension property 295

0209–9683/100/$6.00 ©2000 János Bolyai Mathematical Society

NUMBER 3

ODED GOLDREICH, SHAFI GOLDWASSER, ERIC LEHMAN, DANA RON, ALEX SAMORODNITSKY: Testing monotonicity 301
JEFF KAHN: A normal law for matchings 339
SANJEEV KHANNA, NATHAN LINIAL, SHMUEL SAFRA: On the hardness of approximating the chromatic number 393
JEONG HAN KIM, VAN H. VU: Concentration of multivariate polynomials and its applications 417
NOTES
KATHIE CAMERON: A min-max relation for monotone path systems in simple regions 435
DENNIS EICHHORN, DHRUV MUBAYI: Edge-coloring cliques with many colors on subcliques 441
ROMEO RIZZI: On minimizing symmetric set functions 445

NUMBER 4

NOGA ALON, ELDAR FISCHER, MICHAEL KRIVELEVICH, MARIO SZEGEDY: Efficient testing of large graphs 451
MALGORZATA BEDNARSKA, TOMASZ ŁUCZAK: Biased positional games for which random strategies are nearly optimal 477
ROBIN FORMAN: Morse theory and evasiveness 489
JOEL FRIEDMAN: On Cayley graphs on the symmetric group generated by tranpositions 505
A. V. KOSTOCHKA, M. STIEBITZ: On the number of edges in colour-critical graphs and hypergraphs 521
BENOIT LAROSE, CLAUDE TARDIF: Hedetniemi's conjecture and the retracts of a product of graphs 531
NATHAN LINIAL, ALEX SAMORODNITSKY, AVI WIGDERSON: A deterministic strongly polynomial algorithm for matrix scaling and approximate permanents 545
LAJOS RÓNYAI: On a conjecture of Kemnitz 569
ALEXANDER SCHRIJVER: Total dual integrality of matching forest constraints 575
GÉZA TÓTH: Finding convex sets in convex position 589
